

Improving your shower's energy efficiency

Very energy-efficient. Lower running costs.

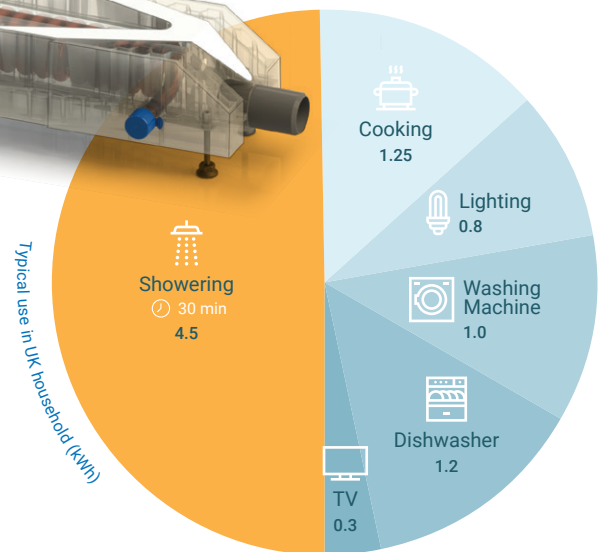

Not energy-efficient. Higher running costs.

ZYPHO[®] TAKES YOU HIGHER

Zypho[®] can provide a home with the same EPC uplift as installing triple glazing – at a fraction of the cost.

- ✓ Pound for pound, Zypho[®] Heat Recovery offers some of the cheapest SAP points available.
- ✓ Zypho[®] can provide the same EPC uplift as upgrading to triple glazing – but at a fraction of the cost (i.e. a few hundred pounds, versus a few thousand)
- ✓ Zypho[®] improves the efficiency of your shower by between 30-65%.
- ✓ Installing one or more Zypho[®] units in a property is a cost-effective way to help your building project to meet Part L regulations.

WHY CHOOSE ZYPHO[®]?

After space-heating, hot water is the largest energy consumer in the home. By the simple act of recovering heat from waste water, **Zypho[®] improves the efficiency of the shower by between 30–65%**, depending on the application and model. Perfect for new build or for retrofitting, its unique, self-contained mechanism requires no mains connection or maintenance.

Low cost • Easy to fit • Low maintenance • Significant energy savings
